I'm
Here!

Our beloved InSpirit Pets are not "gone forever" when they pass. They have left their furry bodies, but their Essence, who they truly are, is still around & still with us.

Our InSpirit Pets often leave physical signs for us, to let us know that they are still around. They can try hard and get creative, trying to tell us, I'm here!

In this e-Book, you'll learn some of the most common signs left by InSpirit Pets; and also some of the amazing creative signs InSpirit Pets have left for their persons to show that they will love them forever.

Love
Forever

Feathers

Big feathers, teeny tiny feathers... feathers on the ground, feathers floating down thru the air...

Feathers are a common sign from an InSpirit Pet to show their presence. Feathers have shown up inside houses, or come floating across the air, right in front of the person.

One pet parent asked her beloved dog, Skippy, to please send unusual feathers so she would know for sure it was from Skippy. Sure enough, she was bending over to pick up a bucket off the ground, and there was this teeny tiny white feather by her foot.

Doves

Doves are another sign often used by InSpirit Pets to indicate their presence. Doves are commonly seen as symbols of love, peace, and messengers.

In a beautiful example, a woman's horse had recently passed in the Springtime. During fall there were often gray ring-tailed doves around with their lovely cooing sound. A few days after her horse Romeo died, she saw a white dove flying around the barn and landing on a tree limb. Never before had she seen a white dove in the years she had lived there. This dove appeared every day for a week; and then now again as the months went by. She saw this as a sign her Romeo was present.

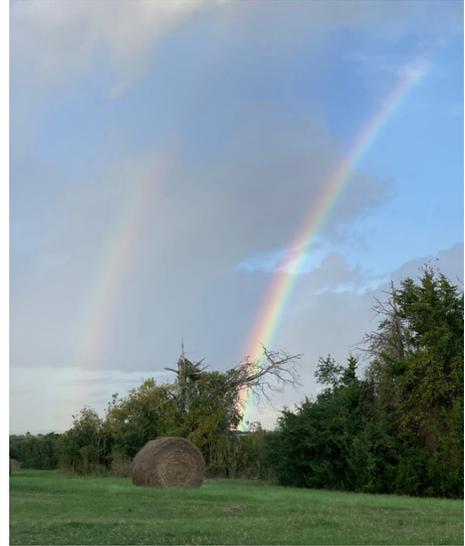

Heart-Shaped Rocks

Have you ever found a heart-shaped rock? Or started seeing heart-shaped rocks every where? This could be a sign from your InSpirit Pet, letting you know they are around. There are many stories of pet parents finding heart-shaped rocks in unusual places.

One lovely story goes like this... A Pet parent was walking thru the woods on her property, thinking about her beloved departed pet. She was thinking about the good times they had together and how much she missed her pet. As she looked down to carefully step over a tree root, there saw a beautiful heart-shaped rock, like it was waiting for her to find it. Happy tears flowed because she had no doubt this was her sweet pet reaching out to her.

Rainbows

Rainbows are another common sign that InSpirit Pets use to let you know they are present. Seems that everyone associates rainbows with positive, uplifting feelings, and knowing it's a message from your Beloved Pet In Spirit just adds to the Joy!

A pet parent of a lovely dog shared " She sent us lots of rainbows. Each time we saw one we felt immediately that she was near us. My husband even got a double one when he was on a business trip.

The beautiful double rainbow in the picture is from Lauren's family farm and came out as she was walking with her dog, Reba, and thinking of when Skippy would walk with her.

Sounds & Smells

Your InSpirit Pet might send you a particular sound that is out of place in your normal life. You may even hear a song that reminds you of your InSpirit Pet or a song just shows up in your head. These are ways your InSpirit Pet is reaching out to you.

Smells might be unusual - like the sudden smell of bacon in the house when it hasn't been cooked in weeks. Or as one pet parent shared that she would sometimes smell urine in the wee hours of the morning; and explained that "Yes the urine smell came from the fact that [her pet] had urinary leakage when she aged. I knew immediately when she had leaked by the smell"

Other Signs

Pet parents share the signs their InSpirit Pets leave for them:

" I often feel, under my right hand, my dog partner and now angel, Cache. I am comforted anytime I feel him as that was always his chosen place when he was in physical form."

"I sometimes can smell my pet, I hear scratching on the bathroom door when I'm taking a shower (one of my dogs used to do this), I hear my dog walking across the wood floor, I catch glimpses of my pets out of the corners of my eyes, I suddenly see them in my mind's eye or hear them talking to me"

Other Signs

"One of my favorite signs I get from my beloved kitties who have crossed over: every once in a great while I'm woken from sleep with the certainty that one of my kitties just leaped upon my bed. I feel the bed shake as they land with a cat-sized heft, and I can briefly feel the weight of their body compressing the bedding, yet they have all crossed the Rainbow Bridge! One time I swear I heard one purring with delight just afterwards, right near my ear :). It gives me comfort to know they come to check on me now and then in this manner."

"Our dog Vinnie always lay on a specific stone tile right outside our kitchen while. We were making dinner (ours or theirs). Since his passing our dog Zam began rolling on that specific tile, and only that tile. Our newest puppy also rolled there without seeing Zam do it first. Awesomeness"

Other Signs

"Elsa rubs against my legs, she also woke me up by jumping on the bed, and one time just before a small surgery, which made me very nervous, she sent me the song which reminds me of her."

"Three cardinals still land on his grave three years after his death, a half dead rose bush bloomed a beautiful white rose over night, a clump of his fur blew over my foot even after heavy rain. When I am really missing him I can feel his presence placing his face on my face as he always did"

"He comes to me in dreams - I can feel his breath right next to me. I can smell and feel him next to me, even though it's almost a year since he left I still find bits of his fur appear from nowhere when I most need him"

Other Signs

"I found a whole sand dollar at the coast. When Jack passed away I went to the ocean to process my feelings and grieve as the ocean is a special place for me. Sand dollars are also very special to me. I always told Jack every time I went to the beach, I looked for a whole one, but I never found one while he was alive. I recently just went back to the coast having a hard time and in the middle of nowhere I found one!! I just felt he was there reminding he is always with me even after 2 months since he passed."

Hopefully, these examples of signs from Pets InSpirit will inspire you to be on the lookout for signs from your beloved InSpirit Pet. Keep your eyes & ears open (and your other senses too)!

Want to Know More?

Do you want to hear from your InSpirit Pet so that you can find out how they are and how they're feeling?

Do you want to connect with your InSpirit Pet so that you can release some of the grief & Pain you are feeling?

Do you want to be able to ask your InSpirit Pet questions so that you can find some peace?

If you answered yes to any of these, then contact Lauren for an InSpirit Pet Communication Session to have a conversation with your InSpirit Pet

Lauren can be reached at: laurenlee.sarlya@gmail.com or on Facebook at <https://www.facebook.com/LaurenSarlyaAC>

Meet Lauren

Lauren Lee Sarlya - Animal Communicator

** helping Pet Parents move from grief to peace with their InSpirit Pet **

Lauren's beloved dog Skippy came to his end-of-life in February of 2021 and Lauren and he communicated thru the entire process, even as he transitioned. Being able to communicate with Skippy after he died, brought Lauren a lot of peace & comfort and she is passionate about helping other pet parents connect with their beloved InSpirit Pets and keeping the love & relationship alive.

Lauren offers InSpirit Pet Communication Sessions where she will communicate with your InSpirit Pet; and Lauren also offers an InSpirit Pet Communication Mentoring program to teach pet parents to connect with their own InSpirit Pets.
